SENIOR PRODUCT DESIGNER · LUMEN (B2B SAAS)

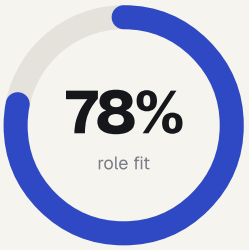

Priya Raman

AI voice interview · Oct 16, 2026 · 27 min · 14 questions, 9 follow-ups
Also reviewed: CV · test task brief · Figma solution · candidate's note

● Recommendation Confidence: medium-high

Advance to the final round.

Strong product and UX reasoning at senior level, backed by numbers. Research depth is **unproven, not weak**, and one CV claim is overstated. Both can be closed in a single 45-minute conversation.

Fit to your Senior bar

8 competencies, weighted by your job post

Level read	Evidence quotes	CV claims that held up	Shortlist position
Senior	**23**	**4** of 6	**#2** of 5
solid · not yet Lead	each with a timestamp	1 overstated · 1 to check	for this role

Why she stands out

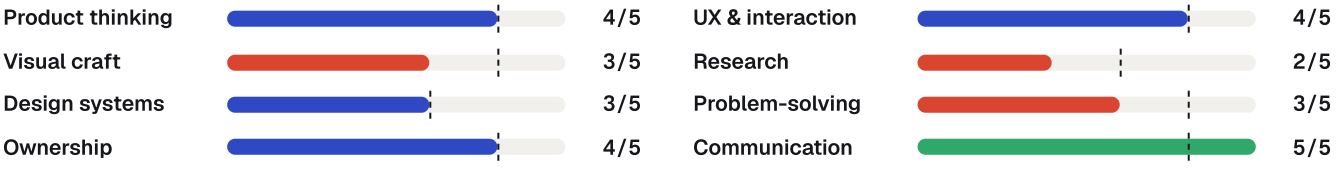

- **Trades revenue for a metric — and says when she'd reverse.** Cut a paid upsell step; completion 61% → 74%. `06:42`
- **Defends scope with a user reason.** Dropped team invites from v1 of the test task, consistent with her Figma file. `08:10`
- **Communicates like a senior.** Structured, concise answers without prompting across all 27 minutes.

What to verify before an offer

- **Research ownership.** No study she planned herself after two follow-ups. `14:03`
- **"Led the design system."** In the call she described building components; another designer owned the system. `22:15`
- **Attribution of the 61 → 74% lift.** A pricing change shipped the same month.

Scores at a glance

01 · COMPETENCY MATRIX

Where she clears your bar — and where she doesn't.

Above the bar

Communication

Lead-level clarity. Will hold her own with founders and engineering leads.

On the bar

Product thinking · UX · Ownership · Systems

Senior-level evidence with numbers and trade-offs.

One step below

Research · Visual craft · Problem-solving

Research is thin evidence, not a proven gap. Visual craft gap comes from the test task.

Competency	Junior	Middle	Senior	Lead	vs bar	Evidence
Product thinking			BAR		on bar	5 quotes
UX & interaction			BAR		on bar	4 quotes
Visual craft			BAR		-1	2 quotes
Research thin evidence		BAR			-1	2 quotes
Design systems		BAR			on bar	2 quotes
Problem-solving			BAR		-1	3 quotes
Ownership			BAR		on bar	3 quotes
Communication			BAR		+1	2 quotes

Levels are calibrated to the job post you pasted: "Senior Product Designer, B2B SaaS, owns end-to-end flows, works with one PM and 4–6 engineers." Weights: product thinking and UX ×1.5, everything else ×1.

Lead signals 2

Reverses her own decision when the data turns. Frames design work as business trade-offs.

Senior signals 7

Owns flows end to end, scopes v1 with a user reason, negotiates with engineering.

Below-senior signals 2

Leans on a researcher for studies. Needed prompts to structure an open problem.

02 · EVIDENCE

Every score shows its receipts.

The strongest quote behind each score, the timestamp to jump to, and how the AI read it.
Tap any timestamp in the app to hear the moment.

Product thinking — 4/5

06:42 “We dropped the upsell step even though it made money — it was where 30% of people left. Completion went from 61 to 74 percent.”

AI read: Weighs a business metric against revenue and names when she would reverse. Senior-level reasoning.

Confidence: High · 5 quotes

UX & interaction — 4/5

08:10 “In the take-home I skipped team invites in v1 — admins wanted to see value alone before inviting anyone.”

AI read: Defends a scoping decision with a clear user reason, consistent with her Figma file.

Confidence: High · 4 quotes

Visual craft — 3/5

11:30 “I kept the visual style close to your current UI — I didn’t have time to polish the empty states.”

AI read: Clean layout, but spacing drifts and a secondary button fails contrast. Owns the gap.

Confidence: Medium · 2 quotes · -1 vs bar

Research — 2/5

14:03 “Our researcher ran the sessions, I joined some and we synthesised together.”

AI read: No study she planned herself after two follow-ups. Missing evidence, not proof of weak skill.

Confidence: Low · 2 quotes · -1 vs bar

Design systems — 3/5

22:15 “I built the table and filter components; Anna owned the system overall.”

AI read: Solid contributor. Contradicts “led the design system” on the CV.

Confidence: Medium · 2 quotes

Problem-solving — 3/5

17:22 “If activation dropped I’d check who was arriving first — maybe it’s traffic, not the flow.”

AI read: Sound first hypothesis, but needed several prompts to narrow it down.

Confidence: Medium · 3 quotes · -1 vs bar

Ownership — 4/5

20:45 “Engineering wanted to cut the empty states. I paired with them and we shipped a simpler version.”

AI read: Takes responsibility and finds a workable compromise with engineering.

Confidence: High · 3 quotes

Communication — 5/5

whole call “Structured, concise answers across 14 questions — no rambling, no prompting needed.”

AI read: Lead-level clarity. Comfortable with founders and engineering leads.

Confidence: High · 2 quotes · +1 vs bar

MOMENT THAT MATTERED

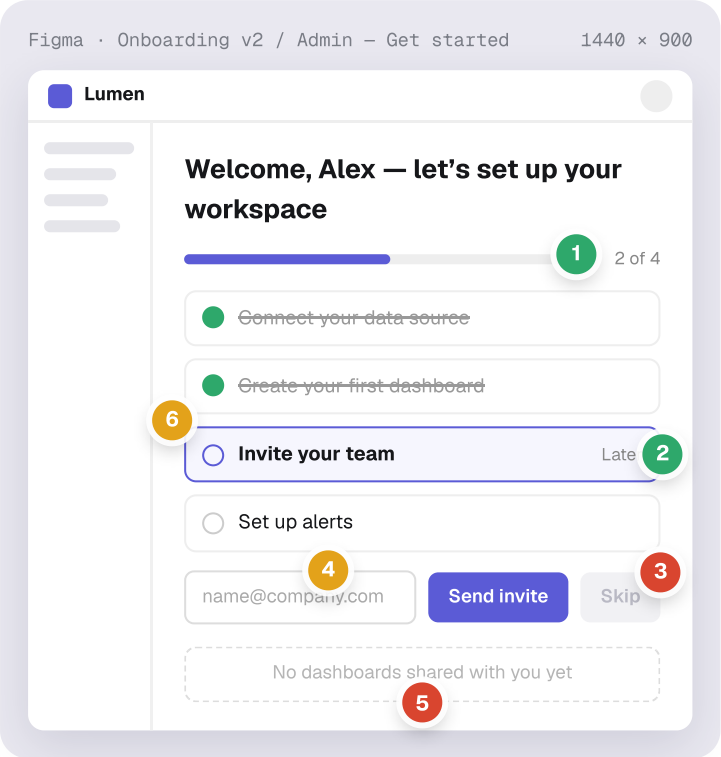

“If completion had dropped below 65% after the pricing change, I’d have brought the upsell back — revenue per user mattered more at that point.”

07:30 · Unprompted reversal condition. This is the clearest senior-to-lead signal in the interview.

03 · TEST TASK REVIEW

Her solution, annotated.

Brief: “Redesign first-run onboarding for team admins.” Reviewed from her Figma file, then probed live — the AI asked her to defend each decision.

2 strengths · 2 issues · 2 to polish

1 Progress you can see
Checklist + “2 of 4” bar sets clear expectations. Matches the brief’s “time to first value”.

2 Invites are optional
“Later” lets admins explore alone first — her strongest, best-defended decision.

3 “Skip” fails contrast
Secondary button text #B9B9C4 on #F1F1F4 ≈ 1.8:1. WCAG AA needs 4.5:1.

4 No error state
Invite field has no invalid-email or already-invited state in the file.

5 Dead-end empty state
“No dashboards shared yet” gives no next step. Brief asked for a path to first value.

6 Spacing drifts
Gaps vary between 6, 8 and 9 px across the list — not on a 4/8 grid.

Brief coverage

4 of 6 met

Met	Reduce steps to first dashboard	5 → 2 steps
Met	Admin can defer team invites	“Later” option
Met	Show setup progress	Checklist + bar
Met	Works with existing UI kit	Reuses Lumen components
Partial	Accessible (WCAG AA)	Contrast fails on “Skip”
Missing	Empty and error states	Not designed

How she defended it live

08:10 “I skipped team invites in v1 — admins wanted to see value alone before inviting anyone.” **Convincing.**

11:30 “I kept the visual style close to your current UI — I didn’t have time to polish the empty states.” **Owns the gap, no plan for it.**

12:40 Asked about mobile: “Admins set up on desktop.” **Plausible, but no data behind it.**

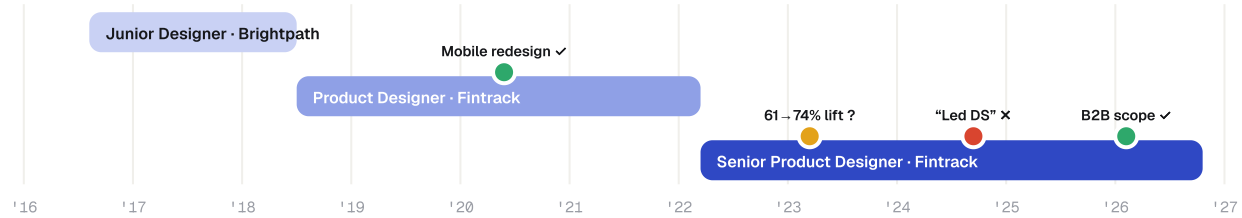

04 · CV VS INTERVIEW

What her CV says vs what she told us.

Every major CV claim was checked against her own words. Contradictions are flagged — not to disqualify, but so you ask the right question.

Career, as verified in the call

Bars = CV · markers = what the interview confirmed

Overstated

CV says
"Led the design system at Fintrack (40+ components)."

In the interview `22:15`
"I built the table and filter components; Anna owned the system overall."
→ **Ask: what did you decide about the system, not just build?**

Needs check

CV says
"Redesigned checkout, lifting completion from 61% to 74%."

In the interview `07:05`
Numbers match. But: "Pricing also changed that month."
→ **Ask: how did you separate the redesign's effect?**

Partly

CV says
"Ran a continuous user research program."

In the interview `14:03`
"Our researcher ran the sessions, I joined some."
→ **Ask for one study she planned end to end.**

Confirmed

CV says
"Shipped the Fintrack mobile app redesign."

In the interview `04:20`
Described navigation trade-offs and launch metrics in detail.

Confirmed

CV says
"5+ years in B2B SaaS."

In the interview `02:10`
Specific, consistent examples from admin and data-heavy tools.

Confirmed

CV says
"Partnered with PMs on roadmap priorities."

In the interview `19:40`
Walked through a quarterly trade-off with her PM, with reasons.

4 claims confirmed with concrete detail

1 claim needs a reference check

1 claim overstated on the CV

05 · THE INTERVIEW & NEXT STEPS

27 minutes, mapped. And your next 45.

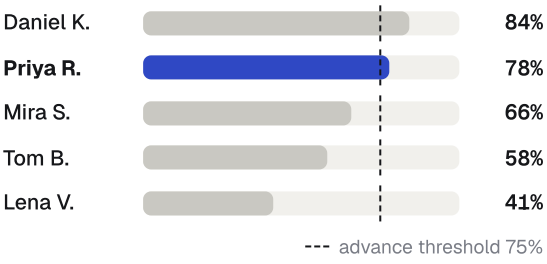

How the conversation went

Answers with numbers	Consistent when re-asked	Candidate talk time	Candidate experience
6 of 9 stories	**2** of 2	**71%**	**4.8** / 5

Shortlist · this role

fit to your Senior bar

All 5 interviewed in 3 days, no calls scheduled.

Your final-round plan · 45 min

15 min **RESEARCH**

"Tell me about a study you designed yourself. What did you choose not to test?"

Good answer: her own hypothesis, method choice, and what changed because of it.

15 min **ATTRIBUTION**

"How did you separate the redesign's effect from the pricing change?"

Good answer: a holdout, cohort split, or an honest "we couldn't — here's what I'd do".

15 min **SYSTEMS**

"Walk me through one decision you made for the design system."

Good answer: a principle or token she set and why — not a component she drew.

Reference check · ask her last manager

- Who owned the design system day to day?
- Which part of the 61 → 74% lift came from the redesign vs pricing?

How this report was made

Built from the 27-min voice interview, CV, test task and her note. The AI suggests; it never rejects anyone. Every score can be overridden — the original stays visible to your team.
